1. Warnings

- Installation at site should be done by skilled and qualified personal after taking required approvals.
- Use proper protection gear and tool while installing the device.
- Be aware of your surroundings while doing the installation work.
- Serious injury can occur if proper safety norms are not followed.
- Compliance with all utility and electrical safety codes regulations are mandatory.
- Read the manual and get acquainted with the datalogger connections and terminals before commencing installation activity.
- Before connecting the datalogger, read its label to confirm power supply requirements.
- All connections should be done only when power to device is switched off.
- Improper installation and connections may damage the device and sensors connected to the same.
- Protect from overvoltage and static electricity.
- To prevent potential fire or shock hazard, do not expose the datalogger to rain or moisture.
- Physically damaged equipment should not be used or connected to main power.
- Use proper earth connection.

2. MBSoiling Station

MBSoiling Station series-700is advanced range of soiling station. The soiling station provides following advanced functions:

- 3. Uses latest ARM 32 bits processor.
- 4. Real time monitoring of clean and soiled PV panels.
- 5. Regular monitoring and filtering of soiling parameters.
- 6. All measurements are available via serial RS485 (MODBUS RTU) and ETH (MODBUS TCP) ports.
- 7. Modem 4G (optional) for communication of logged files to remote servers.
- 8. MODBUS TCP (master and slave), SNTP, FTP and DNS.
- 9. All parameters are available as MODBUS (RTU or TCP) slave parameters.
- 10. External SD memory card (16GB) for data logging.
- 11. Programmable data logging interval.
- 12. Embedded webserver for configuration of soling functions and diagnostics (real time view of measured parameters). No programming is required.
- 13. MyPage to display user selected parameters in one webserver page.
- 14. Internal battery backed up real time clock (RTC).
- 15. Data file transfer to two file servers.
- 16. Internal memory of 32MB and expandable SD card memory up-to 16GB.
- 17. Log for user activity and device messages/ faults.
- 18. Calibrate soiled panel with respect to clean panel.
- 19. Powered via solar charge PV panel or AC power supply.
- 20. Optional automatic cleaning of soiled and clean panels. With monitoring of cleaning liquid level in the tank.
- **21.** Excellent on-site diagnostic support with soiling station status and value reports.

2.1 MBSoiling Station Applications

The soling station is used to measure power generation losses due to soiling of panels in of photovoltaic plant. Number of soiling stations to be installed in a plant will depend on its topology and size. Guidelines provided in IEC-61724-1 should be followed.

Soiling station can be used in various applications:

- Site resource and generation capacity assessment.
- Scheduling of PV panel cleaning.
- Plant performance evaluation.

2.2 Soiling Parameters

Following soiling parameters are measured and calculated:

Sl. No.	Parameter	Description
1	Clean Panel Voltage	Clean Panel open circuit voltage
2	Clean Panel Current	Clean Panel short circuit current
3	Clean Panel Temperature	Clean Panel temperature

4	Soiled Panel Voltage	Soiled Panel open circuit voltage	
5	Soiled Panel Current	Soiled Panel short circuit current	
6	Soiled Panel Temperature	Soiled Panel temperature	
7	Reference panel Effective Irradiation - EffRadClean	Calculated based on panel short circuit current and panel temperature for reference panel. This calculation also compensates for the panel temperature and the panel temperature coefficient.	
8	Soiled panel Effective Irradiation - EffRadSoil	Calculated based panel short circuit current and panel temperature for soiled panel. This calculation also compensates for the panel temperature and the panel temperature coefficient.	
9	Soiling Ratio	EffRadSoil/ EffRadClean	
10	Soiling Index (%) (SLI)	(1- EffRadSoil/ EffRadClean)*100. This calculation is also compensated for calibration constant of soiled panel.	

Table -2.2: Soiling parameters

2.3 MBSoiling Station Models

Various options and models available are shown in table 2.3 below:

Sl. No.	Features	700XXX 700XXH	700XMX 700XMH	700CXX 700CXH	700CMX 700CMH
1	Port Serial Port -1 RS-485 (MODBUS RTU	•	•	•	•
	Slave)				
2	Port ETH (MODBUS TCP Slave, Web Server, FTP and SNTP)	•	•	•	•
3	Cellular Modem	-	•	-	•
4	MMC SD Card (16GB)	•	•	•	•
5	Maximum number of MODBUS TCP Slave clients	4	4	4	4
6	SNTP Client	1	1	1	1
7	File Transfer Clients	2	2	2	2
8	RTC (battery backed up)	•	•	•	•
9	Solar PV Power supply	•	•	-	-
10	AC Power supply	•	•	•	•
11	Auto Panel cleaning	-	-	•	•

Table-2.3: Soiling Station models

Note: C: Soiling station with cleaning option.

M: Soiling station with modem H: Soiling station with high wattage solar panel

3 MBSoiling Station Installation

MBSoiling Station connections are described in this section. All connections described here may not be available in your soiling station. Features and connections available will depend on the model selected.

3.1 MBSoiling Station With Solar Charger:

Soiling station can be powered via solar PV panel or AC power supply. Diagram for soiling station is shown in figure 3.1 below.

Fig - 3.1 Soiling station with solar charger

Parts of soling station with solar charger are listed in table-3.1 below.

Sl. No.	Part	Model	Description		
	Soiling Station				
1	Pole	MS Pole- three	Galvanized pole with tripod and		
1		meters	accessories.		

	Measurement panels boom Pipes		Galvanised- for installing measurement solar panels along
	r · · ·		with mounting accessories.
2	Panel Clean	50W	Clean solar panel
3	Panel Soiled	50W	Soiled solar panel
4	Temperature sensor – clean panel	MBMet-801B-3000	PT1000 with three meters cable
5	Temperature sensor – soiled panel	MBMet-801B-3000	PT1000 with three meters cable
7	Lightning Arrester		Copper
8	Copper strip	25x2.5mm – Five meters	For earthing lightening arrestor
9	Solar charging panel	50W	Solar charging panel
10	Charging panel boom Pipes		Galvanised- for installing charging solar panel along with mounting accessories.
11	Cables		Required interconnecting cables
	•	Soiling Station Control	ol Box
1	Soiling station controller	MBMet-700X	Soiling station controller as per selected model
2	Battery charger		Battery charger
3	Battery	16AH	Battery to power soiling station
4	AC Power supply	12V/ 3A	Backup power supply
5	Enclosure		IP65
6	Enclosure mounting accessories		
7	Power supply and serial port protection devices		

Table- 3.1: Parts of soiling station

3.2 MBSoiling Station – Without Solar Charger:

Diagram for soiling station without solar charger is shown in figure 3.2 below.

Fig - 3.2 Soiling station without solar charger

Parts of soling station without solar charger are listed in table-3.2 below.

Sl. No.	Part	Model	Description
		Soiling Station	
1	Pole	MS Pole- three meters	Galvanized pole with tripod and accessories.
	Measurement panels boom Pipes		Galvanised- for installing measurement solar panels along with mounting accessories.
2	Panel Clean	50W	Clean solar panel
3	Panel Soiled	50W	Soiled solar panel
4	Temperature sensor – clean panel	MBMet-801B-3000	PT1000 with three meters cable
5	Temperature sensor – soiled panel	MBMet-801B-3000	PT1000 with three meters cable
7	Lightning Arrester		Copper

8	Copper strip	25x2.5mm – Five meters	For earthing lightening arrestor
9	Cables		Required interconnecting cables
		Soiling Station Control	ol Box
1	Soiling station controller	MBMet- 700X	Soiling station controller as per selected model
2	Enclosure		IP65
3	Enclosure mounting accessories		
4	Power supply and serial port protection devices		

Table- 3.2: Soiling station without solar charger

3.3 MBSoiling Station - Cleaning:

Clean panel of the soiling station should be cleaned periodically depending on local dust conditions. This should be done at least once in a day. Soiled panel should be cleaned as per cleaning schedule of the generation PV panels.

3.4 MBSoiling Station Controller Connections

Soling station controller connections are explained here.

3.4.1 PV Panel Interface

Connections for clean and soiled solar panels are shown in figure -3.4.1 below.

Figure-3.4.1: Clean and soiled panel connections

Details of measurement PV panels connections are provided below in table 3.4.1.

Terminal	Wire Colour	Description	Remarks	
T18	White	W1	Clean panel temperature	
T19	White	W2	measurement using 3-wire RTD	
T20	Red	W3	Connection.	
T21	Red	W4		
T22	White	W1	Soiled panel temperature	
T23	White	W2	measurement using 3-wire RTD	
T24	Red	W3	Connection.	
T25	Red	W4		
T26	Red	Clean Panel +	Clean papel massurement	
T27	Black	Clean Panel -	Clean panel measurement	
T28	T28 Red Soiled Panel +		Soiled penal manufactor	
T29	Black	Soiled Panel -	Solied panel measurement	

Table-3.4.1: Measurement solar panel connections

3.4.2 MBSoiling Station Power Supply Connections

Soiling station controller power supply connections are shown in figure 3.4.2 below. **These terminals are not plugin type**.

Figure-3.4.2: Soiling station controller power supply connections.

Terminal	Wire Colour	Function	Remarks
T1	Red	V+	Voltage Range: DC 9 to
T2	Green	Earth	32VDC
Т3	Black	V-	Power Consumption (Without modem) – 4W Power Consumption (With modem)- 10W Use proper MCB.

Power supply connections details are listed in table-3.4.2 below.

Table-3.4.2: Soiling station controller connections

3.4.3 Serial Port -RS485

Soiling station serial port - RS485 are shown in figure 3.4.3 below. This port can be used only as MODBUS slave to read soling parameters.

Figure-3.4.3: Soiling station serial port-1 (RS485) connections.

Note: Serial port-2 is not used.

Terminal	Wire Colour	Function	Remarks
T7	White	А	Isolated RS485 port.
T8	Green	Shield	LED Rx and Tx provide indication
T9	Brown	В	for port activity. Can operate only as MODBUS RTU Slave. Use low capacitance, twisted pair and shielded cable for connecting devices to the port.

Connection details for the serial port are listed in table-3.4.3.1 below.

Table-3.4.3.1: Soiling station serial port- RS485 connections

Default configuration for the serial RS485 port is provided in table 3.4.3.2 below.

S. No.	Description	Value
1	Baud rate	9600
2	Data bits	8
3	Parity	None
4	Stop bits	1
5	MODBUS Slave address	1

 Table-3.4.3.2: Default port configuration parameters

These parameters can be changed via the embedded web server.

3.4.4 Port ETH

This ETH port (base 10MHz) is multi- function port.

Figure-3.4.4.1: Soiling station ETH Port.

LAN CABLE

Use standard LAN cable with RJ 45 connector for connecting to the port. Port activity LED are provided on the connector.

This port is used for following operations:

- i) Configuration of soiling station via embedded web server.
- ii) Downloading logged file.
- iii) MODBUS TCP slave (multiple masters) to provide measured and collected parameters to other devices and SCADA.
- iv) SNTP Client for time synchronization.
- v) File transfer client (ftp).

Configuration details for ETH port are provided <u>here</u>.

Default network configuration for the ETH port is provided in table 3.4.4 below.

S. No.	Description	Value
1	Device IP	192.168.100.222
2	Network Mask	255.255.255.0
3	Network Gateway IP	0.0.0.0
4	Primary DNP IP	8.8.8.8
5	Secondary DNS IP	8.8.4.4

Table-3.4.4: Default ETH port network configuration

These parameters can be changed via the embedded web server.

Procedure for setting default IP address in the soiling station is provided below. This procedure should be followed only if IP address of the soiling station is not known. If

soiling station IP address is known, use webserver in the soiling station to set the required IP address.

Figure -3.4.4.2: Jumpers for setting default IP address in the soiling station.

- 1. For normal operation jumper 6 and 4 shall be in open condition.
- 2. For setting default IP address short jumper 6 and 4 for about two seconds.
- 3. Remove the jumper between 6 and 4.
- 4. Wait for about five seconds.
- 5. Soiling station will restart with default IP address. Only default IP address and Subnet shall be set to default values.
- 6. Verify default IP address by using ping and / or logging in the soiling station webserver.

3.4.5 SD Memory Card

Soiling station supports microSD memory card up-to 16GB.

Figure-3.4.5: Soiling station SD card slot.

MicroSD card is used for data logging.

Configuration of data logging operations can be done via webserver.

3.4.6 Internal Modem (Optional)

Availability of internal modem is based on selected model. High speed 4G modem (CAT-1) is provided.

Figure-3.3.6: Soiling station internal modem.

Micro SIM slot is provided. Push the SIM inside to lock or un-lock the same. Use the antenna provided along with the modem. Contact our sales team if high gain antenna is required.

Modem configuration details are provided <u>here</u>.

Details of modem status LEDs are provided in table-3.4.6 below.

LED	Colour	Remarks
Modem Status	Green	Always OFF: Modem not ready. Always ON: Modem ready for operation.
Net Status	Blue	Always OFF: Power OFF. Always ON: Searching for network. ON 200mSec and OFF 200mSec: 4G registered. ON 800mSec and OFF 800mSec: 2G/ 3G registered.

Table-3.4.6: Modem status LED.

The modem can be used for following operations:

- i) SNTP Client for time synchronization.
- ii) File transfer client (ftp).

Configuration details for the modem are provided here.

4 Embedded Webserver

MBSoiling station provides embedded webserver for configuration and diagnostics.

Following functionality is provided via the embedded webserver.

- i) Soling Station configuration.
- ii) Monitor measured parameters.
- iii) Download and delete logged files
- iv) User configuration.
- v) Soiling Station diagnostic messages
- vi) Dropdown list for section of pre-selected options.
- vii) Limit validation for configured parameter values.
- viii) Hoover (take cursor) over the parameter to get further details on the same.
- ix) Details of not all parameters have been provided in this manual (to reduce the size). Further details can be obtained by using hoover over the parameter.
- x) Auto configured parameters will not have editable configuration field.
- xi) Configuration of parameters not applicable will be disabled.
- xii) Limits are displayed for parameters with limits (allowed minimum and maximum values). Default values are provided for most of the parameters.
- After editing any parameter click the cursor on any part of the screen. The parameter valued checked for errors and will be saved if there no error. If any error is found, same will be indicated on right hand top corner of the screen. Wrong values will not be saved and menu option for the parameter will turn red till the wrong value is corrected.
- xiv) All edited parameters will be marked till the same has not been committed.
- xv) Page menu option for the parameter will be marked with 'E'. This mark will be provided at all hierarchy levels (up wards) till "MBLogger Configuration".
- xvi) All configuration of parameters will be saved on 'Commit' operation. Edit marks will also be removed from all edited parameters on 'Commit' operation being successful.

4.1 User Login

Use 'Chrome' to login to soiling station embedded web server.

Use soiling station IP (for first login – use soiling station default IP) to login. Following login screen shall be displayed as shown in figure-4.1 below.

Username	
Password	
Login	

Soiling_Station-700 Configuration and Diagnostics - My Device

Figure-4.1: Soiling station login screen.

User login details are provided in table 4.1 below.

User Type	Default Password	User Rights
Viewer	'Viewer'	Rights to view configuration and view diagnostic information.
Operator	'Operator'	All rights for configuration, operation, and diagnostics.
Admin	'Admin'	All rights for configuration, operation, diagnostics, and user configuration.
Maint Not allowed		Maintenance user is used during manufacturing only.

Table-4.1: User login details

It advisable that first login should be done by 'Admin' and then other users and their passwords should be configured.

4.2 Welcome Page

Upon successful user login, welcome page as shown in figure-4.2 is displayed.

Figure-4.2: User login welcome page.

The welcome page is self-explanatory, all the information required for configuration of the datalogger is provided on the page.

Object No	Description	Remarks
1	Username and role	Displays logged username and role.
2	Button for user logout. User will be automatically logged out if there is no keyboard or mouse activity for three minutes. 'Logout' User will be warned about this by warning sign on right hand top corner of the page. User can do any keyboard or mouse activity to reset the logout timer.	
3	MBSoiling Station Configuration	Left klick on this menu option to configure the soiling station. Menu options below will enable configuration all features of the datalogger. Left click on any menu option to configure the same.
4	Soiling station Diagnostics	Left klick on this menu option to view soiling station diagnostics menu.

Details of welcome page are provided in table 4.2 below.

Table-4.2: Soiling station welcome page

Note:

If the user closes the webpage without logging out, user will have to wait for about three minutes prior to next login.

4.3 Soiling Station Configuration Files

Soiling station configuration files can be saved in the soiling station SD card. Left click on menu option 'Configuration Files' to view the soiling station configuration files saved in the SD card shown in figure-4.3 below.

Figure-4.3: Soiling station configuration files.

Selected menu option shall be highlighted.

Operations available for soiling station configuration files are shown in table 4.3.1 below.

Sr. No	Operation	Action	Remarks
		Right Click menu	Soiling station configuration

		by left clicking on	file all verification procedures.
		the option.	

Table-4.3.1: Soiling station configuration file operations

Options available for saved soiling station configuration files are shown in table 4.3.2 below.

Sr. No	Operation	Action	Remarks
1	Download File	Click on button "Download File" for the file to be downloaded.	Selected file will be downloaded on connect PC/ Laptop. File "Download Status" will show "File Downloaded"
2	Delete File	Click on button "Delete File" for the file to be deleted.	The file will be deleted and removed from the list. Deleted files cannot be restored.
3	Use file for configuration	Click on button "Conf File" for using the file for configuration.	The file will be validated. If validation is OK, soiling station configuration parameters will be displayed as edited parameters. Parameters which do not match with present configuration shall be marked with 'E'. Use 'Device Commit' operation to configure the datalogger with the selected file.

Table-4.3.2: Operations for saved configuration files

4.4 Device Configuration

Left click on menu option 'Device Configuration' to configure soiling station parameters as shown in figure-4.4 below.

Figure-4.6.1: Configuration Soiling calculation

Details of soling calculation configuration are provided in table 4.6.1.1 below.

Sr. No	Parameter	Description	Remarks
1	Soling Parameter	Averaging of soiling	Default Enable
1	Average	parameters	Delault – Ellable
	Soling Parameter	Soiling parameters	
2	Average Time	average time	Default – 900 second
	(sec)	(seconds)	
3	Panel Parameter	Averaging of solar	Default Enable
3	Average	panel parameters	Default – Ellable
	Parameter	Solar panel	
4	Average Time	parameters average	Default – 60 second
	(sec)	time (seconds)	

5	Minimum Irradiation Value	Soiling calculation will be done only if solar irradiation exceeds this minimum value.	Default 250 W/mtr2
---	------------------------------	--	--------------------

Table-4.6.1.1: Configuration – soling parameters

Details of configuration of soling measurement time are provided in table 4.6.1.2 below.

Sr. No	Parameter	Description	Remarks
1	Solar Noon Hours	Solar noon hour	Set solar noon time at site.
2	Solar Noon Minutes	Solar noon minutes	This time will vary with month of the year.
3	Measure Time - Minutes	Time in minutes during which soling parameters will be measured.	This time together with solar noon time will be used to measure soiling.

Table-4.6.1.2: Configuration - soling measurement time

Note: Measurement of soling:

- i) Example: Solar noon is configured as 11 Hours and 30 minutes and measurement time is set as 60 minutes.
 - Soiling measurement will start at 10.30AM and stop at 12.30PM.
- ii) As per IEC standard soiling should be calculated between sixty minutes before solar noon and sixty minutes after solar noon.

4.6.2 Solar Panel Parameters

Datalogging of soling panels parameter can be configured clicking on tab "Solar Panel" as shown in figure – 4.6.2 below:

Figure-4.6.2: Solar panel parameters

Datalogging of solar panel parameter can be enabled/ disabled as required.

4.6.3 Soiling Parameters

Datalogging of soling parameters can be configured clicking on tab "Soiling Parameters" as shown in figure – 4.6.3 below:

Soling.astor/30.colputs x + v - 0 ×

Datalogging of soiling parameter can be enabled/ disabled as required.

4.7 Configure – Datalogging Files

All logged files are saved in SD memory card. The card should be formatted with 'FAT32' format before being inserted in SD card holder.

SD card should not be removed or inserted while the soiling station is powered On and in operation. Disconnect power to soiling station prior to inserting or removing the SD card.

Files are saved with .csv extension with date and time.

Sr. No	Directory Name	Description	Remarks
1	'DirDataLogDay'	Stores day log files	Configure operation of day log files.
2	'DirDataLogRFT1'	Stores files for remote file server 1	Configure operation of files for remote file server 1.
3	'DirDataLogRFT2'	Stores files for remote file server 2	Configure operation of files for remote file server 2.

Details of data log directories are provided in table 4.7 below:

Table-4.7: Data log file directories

Soiling station will automatically create missing directories on the SD card.

Parameter values and its attributes will be saved in the data log files if the parameter is configured for datalogging (refer to configuration of individual parameter for more details).

Left click on menu option 'Datalog Files' to configure file operation as shown in figure-4.7 below.

Figure-4.7: Configuration of datalog file operations.

For parameters having pre-selected options, available options are provided as dropdown list.

Following log files can be configured:

- i) 'Day Log File Configuration': Day data log file.
- ii) 'RFT1 Configuration': Remote file transfer-1 configuration
- iii) 'RFT2 Configuration': Remote file transfer-2 configuration

4.7.1 Day Log File Configuration:

Configuration of day log file is shown in figure 4.7.1 below.

Figure-4.13: User configuration.

Use tabs provided to configure the required user.

Configuration details of user configuration are provided in table 4.13 below.

Sr. No	Parameter	Description	Remarks
1	Username	Set username	Users with configured
2	User Password	Set user password	username and passwords will be allowed to operate the datalogger

Table-4.13: User configuration

4.14 Commit Configuration

All edited parameter values must be saved in the soiling station non-volatile memory – this is called 'Commit Operation'. This will be allowed only if configuration of any parameter has been edited (marked by 'E').

Following actions will happen (in the listed sequence) once 'Commit' is initiated.

- i) All logged in users will be logged out.
- ii) All operations of the soiling station will be stopped. This may take some time.
- iii) New configured valued will be saved in internal non-volatile memory of the soiling station.
- iv) All operations of soiling station will resume with new configuration. This may take some time.
- v) User can login again (if required) with assigned credentials.

Left click on menu option 'MBSoiling Station Configuration' to select the same. Right click on MBSoiling Station Configuration' to see the submenu option to commit the configuration as shown in figure-4.14 below.

Figure-4.14: Commit operation.

Note:

- i) Once committed, the configuration cannot be reverted. It is irreversible operation. The soiling station must be re-configured if any change is required.
- ii) User will be logged out on commit operation. User can login again once the soiling station re-starts.
- iii) Soiling station will take few seconds to re-tart its operation.

5 Embedded Webserver– Diagnostics

MBSoiling Station provides extensive diagnostics and monitoring functionality via webserver.

Following diagnostic features are provided:

- i) Monitor real time values from all inputs.
- ii) Monitor MyPage parameters
- iii) Status of datalogger resources
- iv) Messages from datalogger for user login history, operations, and hardware faults.
- v) All parameter values, their calculated statistical values and status will be updated in real time (at preset time interval). Animation is provided when the values are updated.
- vi) Parameter values will be updated with their quality. Bad quality values will be shown in red.

Left click on menu option 'MBSoiling Station Diagnostic' to open the diagnostic menu as shown in figure -5 below.

Figure-5: MBSoiling Station diagnostic page.

5.1 MBSoiling Station Status

This status page displays status of datalogger services and modem status:

5.1.1 MBSoiling Station Status

Select tab 'MBSoiling Station Status' to view details of the soiling Station and status of services as shown in figure-5.1.1 below.

Figure-5.5: Soiling Station messages

Details of soiling station messages are provided in table 5.5 below.

Sr. No	Parameter	Description	Remarks
1	Description	Message description	Hardware faults will be
2	Message Code	Message code	displayed in red.

 Table-5.5: Soiling Station messages

Following operation are possible:

- i) Download Device Status Report
- ii) Download Device Value Report
- iii) Delete Soiling Station Message

Click on the option required.

5.5.1 Download Device Status Report

Click on this option to download status of soiling station in .txt file. It will also download logged messages.

Downloaded file will have following information:

- i) Date and time of report
- ii) Model and serial number details.
- iii) Status of services on the soiling station.
- iv) Status of sensors connected.
- v) List of all the messages logged.

2022.01.3 Download Device Value Report

Click on this option to download values of all parameters from all inputs in .txt file. Downloaded file will have following information:

- i) Model and serial number details.
- ii) All measured values and quality.

Following information is provided in this report:

- i) Date and time of report
- ii) Description of parameters.
- iii) **'Qual'**: quality of parameter value. Good quality values will be marked as 'GD'. Bad quality values will be marked as 'IV'.
- iv) **'Value'**: parameter value in float format.
- v) **'Value_Min'**: minimum value of the parameter for the block time.
- vi) **'Value_Man'**: maximum value of the parameter for the block time.
- vii) **'Value_Avg'**: average value of the parameter for the block time.
- viii) **'Value_SD'**: Standard deviation for the parameter. It will be displayed only if the same is enabled in parameter configuration.
- ix) **'Value_Int'**: Integrated value for the parameter. It will be displayed only if integration is enabled in parameter configuration.

2022.01.3 Delete MBLogger Messages

This option is not available.

5.6 Solar Panel Offset Calibration

This operation can be done by only "Maint' user.

This operation calibrates parameters of soiled panel with clean panel. The operation should be done under following conditions only.

- i) Clear sunny day with no clouds.
- ii) At solar noon.
- iii) Solar irradiation should be more than 0.8 sun.

Refer to the screen shown in figure 5.6 below.

Panel offset calibration will be done automatically and will be over in about 30 seconds.

Select "Calibration Stop' in row 'Panel Offset Calibration' and logout.

6 Soiling Station Messages

Soiling station provides messages for the following events:

- i) User login and logout
- ii) Datalogger re-configuration
- iii) Hardware faults

Details of message types are provided in table-6 below.

Sr. No	Message Type	Remarks	Action Required
1	Information	Information message. No effect on operation of the datalogger.	None
2	Fault	Hardware fault. Operation of the datalogger will be affected. Red Led 'ER' on front panel will flash.	Contact service@mbcontrol.com

Table-6: Datalogger message types

6.1 Soiling Station Information Messages

MBLogger operation information messages are listed in table-8.1 below.

46	1046	Maint Login	Information	Maintenance user login and
47	1047	Maint Logout	Information	logout
48	1048	Calibration Mode Start	Information	Datalogger is in calibration mode
49	1049	Calibration Mode End	Information	Datalogger is in normal mode of operation
50	1050	Device Restart	Information	Device has re-started itself.
51	1051	Task Termination Fail	Information	System message for tasks operation

52	1052	Messages Deleted	Information	Logged messages have been deleted.
53	1053	RFT1 Connect Modem Fail	Information	Connection to remote file server -1 has failed via Modem
54	1054	RFT1 Connect Modem OK	Information	Connection to remote file server -1 is OK via Modem
55	1055	RFT2 Connect Modem Fail	Information	Connection to remote file server -2 has failed via Modem
56	1056	RFT2 Connect Modem OK	Information	Connection to remote file server -2 is OK via Modem
57	1057	SNTP Media Change Modem	Information	SNTP client media has been changed from ETH to Modem. This will happen if SNTP client fails to connect to time server via ETH network and modem is working OK.
58	1058	SNTP Media Change ETH	Information	SNTP client media has been changed from Modem to ETH. This will happen if SNTP client fails to connect to time server via modem and ETH network is working OK.
59	1061	Serial Port2 Re Conf	Information	Serial port port-2 has been re-configured
60	1062	ADC-1 Fail	Information	ADC-1 operation failed
61	1063	ADC-1 Error	Information	ADC-1 error
62	1064	ADC-1 Reg Error	Information	ADC-1 register read error
63	1065	ADC-1 ReInit OK	Information	ADC-1 re-initialisation is OK
64	1066	DayLog File Write fail	Information	Error in writing to data log file
65	1967	RFT1Log File Write Fail	Information	Error in writing to remote file server-1 data log file
66	1068	RFT2Log File Write Fail	Information	Error in writing to remote file server-2 data log file
67	1069	Config File Write Fail	Information	Error in writing to device configuration file
68	1070	File Write size mismatch	Information	Mismatch in size of file being written

Table-6.1: Datalogger operation information messages

6.2 Soiling Station Fault Messages

Soling station operation fault messages are listed in table-6.2 below.

Sr. No	Code	Message	Message Type	Remarks
1	2000	QSPI Fail	Fault	Internal non-volatile memory fail. Datalogger will not function.
2	2001	SDRAM Fail	Fault	Internal memory fail. Datalogger will not function.
3	2002	ADC-1 Fail	Fault	Analog input channels – PT1000 will not operate.
4	2004	Modem Fail	Fault	Internal modem will not function. This will affect functions working via modem.
5	2006	RTC Fail	Fault	RTC operation has failed. It will affect all time-based operations
6	2007	RTCbackupF ail	Fault	RTC time was not backed up. Change the RTC backup battery
7	2008	ADC-1 SPI initialisation Fail	Fault	Fault in ADC-1
8	2022	Data Flash Fail	Fault	Fault in controller data flash memory
9	2024	Serial Port 2 Fail	Fault	Fault in datalogger serial port- 2
10	2025	ADC-1 ReInit Fail	Fault	Re-initialisation of ADC-1 failed

 Table-6.2: Soiling station operation fault messages

7 Technical Specifications

2022.01 General Specifications:

Sr. No	Parameter	Specification
1	Micro-Processor	32 bits ARM Processor
2	RTC	Temperature compensated. RTC

Table-7.1: Soiling Station controller general specifications

7.2 Measurement Parameters:

Sr. No	Parameter	Range	Resolution
1	Measurement Panel clean – voltage	40V	0.01V
2	Measurement Panel clean – short circuit current	10A	0.01A
3	Measurement Panel clean – Temperature	-40 to 90°C	0.1°C
4	Measurement Panel soiled - voltage	40V	0.01V
5	Measurement Panel soiled – short circuit current	10A	0.01A
6	Measurement Panel soiled – Temperature	-40 to 90°C	0.1°C
7	Accuracy		0.2%
8	Noise filter		Notch at 50Hz and 60Hz

Table-7.2: Measured Parameters

7.3 Communication Serial Port (RS485):

Sr. No	Parameter	Specification
1	Baud rate	4,800, 9,600 and 19,200 bps
2	Isolation	2.5KV
3	Protocols	MODBUS RTU Slave
3	Protocols	MODBUS RTU Slave

Table-7.3: Serial Port (RS485)

7.4 Communication Port ETH

Sr. No	Parameter	Specification
1	Speed	100MHz
		MODBUS TCP Slave
2	Protocols	SNTP client, FTP, HTTP,
		Embedded web server

Table-7.4: Port ETH

7.5 Internal Modem

Sr. No	Parameter	Specification
1 Mode	Modem Type	Quad band 4G (CAT-1) modem with
	Wodelli Type	antenna.
2	Frequency band	TDD LTE: B40/B41
		GSM: 900/1800Mhz

Table-7.5: Internal Modem

7.6 Datalogging

Sr. No	Parameter	Specification
1	Datalogging time (periodical time)	Site configurable
2	SD Card	Up-to 16GB (FAT32)
3	Protocol	FTP via ETH port or inbuilt Modem

Table-7.6: Datalogging operation

7.7 Electrical

Sr. No	Parameter	Specification
1	Power supply voltage input	9-32 VDC
2	Power Consumption	With cellular modem: 6 W
		Without cellular modem: 4 W

Table-7.7: Electrical specifications

7.8 Environmental

Sr. No	Parameter	Specification
1	Operating Temperature range	-5°C to +60°C
2	Storage Temperature	-20°C to +80°C
3	Operating Humidity	Maximum 95% - noncondensing

Table-7.8: Environmental specifications

7.9 Physical

Sr. No	Parameter	Specification
1	Protection	IP20
2	Dimensions (W x H x L)	90 x 62 x 162 mm
3	Weight	0.5 Kg (59pprox)
4	Mounting	DIN Rail
5	Housing material	Polycarbonate

Table-7.9: Physical specifications

8 Soiling Station MODBUS Slave Registers

All soiling station parameters are available via MODBUS slave registers.

Details of these registers are provided in this section.

8.1 Soiling Station Time

Sr. No	Parameter	Register Address	Туре	Read/ Write
1	Soiling station epoch second	10	32 bits un- signed integer	Read/ Write

Table-8.1: Soiling station RTC time

Note: For writing time to datalogger – 32 bits should be written with write command.

8.2 My Parameters

Sr. No	Parameter	Attribute	Register Address	Туре	Read/ Write
1	My Parameter-1	Value	20	32 bits float	Read only
2	My Parameter-2	Value	22	32 bits float	Read only
3	My Parameter-3	Value	24	32 bits float	Read only
4	My Parameter-4	Value	26	32 bits float	Read only
5	My Parameter-5	Value	28	32 bits float	Read only
6	My Parameter-6	Value	30	32 bits float	Read only
7	My Parameter-7	Value	32	32 bits float	Read only
8	My Parameter-8	Value	34	32 bits float	Read only
9	My Parameter-9	Value	36	32 bits float	Read only
10	My Parameter-10	Value	38	32 bits float	Read only
11	My Parameter-11	Value	40	32 bits float	Read only
12	My Parameter-12	Value	42	32 bits float	Read only
13	My Parameter-13	Value	44	32 bits float	Read only
14	My Parameter-14	Value	46	32 bits float	Read only
15	My Parameter-15	Value	48	32 bits float	Read only
16	My Parameter-16	Value	50	32 bits float	Read only
17	My Parameter-17	Value	52	32 bits float	Read only
18	My Parameter-18	Value	54	32 bits float	Read only
19	My Parameter-19	Value	56	32 bits float	Read only
20	My Parameter-20	Value	58	32 bits float	Read only
21	My Parameter-21	Value	60	32 bits float	Read only
22	My Parameter-22	Value	62	32 bits float	Read only
23	My Parameter-23	Value	64	32 bits float	Read only
24	My Parameter-24	Value	66	32 bits float	Read only

Table-8.2: My Parameters

8.3 Soiling Parameters

Sr. No	Parameter	Register Address	Туре	Read/Write
1	Soling Ratio	10602	32 bits float	Read only
2	Soling Ration – Day average	10604	32 bits float	Read only
3	Soling Index (%)	10606	32 bits float	Read only
4	Soling Index (%) – Day average	10608	32 bits float	Read only
5	Soiling measurement time	10600	32 bits – unsigned	Read only

Table-8.3: Soiling parameters

8.4 Measurement Panel Parameters

Sr. No	Parameter	Register Address	Туре	Read/Write
1		Panel Clean Para	ameters	
1.1	Effective Irradiation (W/mtr2)	10610	32 bits float	Read only
1.2	Short Circuit Currents (Amps)	10612	32 bits float	Read only
1.3	Voltage (V)	10614	32 bits float	Read only
1.4	Panel Temperature (°C)	10616	32 bits float	Read only
2		Panel Soiled Para	ameters	
2.1	Effective Irradiation (W/mtr2)	10618	32 bits float	Read only
2.2	Short Circuit Currents (Amps)	10620	32 bits float	Read only
2.3	Voltage (V)	10622	32 bits float	Read only
2.4	Panel Temperature (°C)	10624	32 bits float	Read only

 Table-8.4: Measurement panels parameters

8.5 Cleaning System Configuration Parameters

Applicable only for soiling stations with auto cleaning system. Cleaning system configuration parameter registers.

Sr. No	Parameter	Register Address	Туре	Read/ Write
1	Auto clean enable b0: =1 for auto clean enable =0: for auto clean disable	10650	16 bits Unsigned Integer	Read / Write
23	Reference panel cleaning time – Hours (0-23)	10651	16 bits Unsigned Integer	Read / Write

3	Reference panel cleaning time – Minutes (0-59)	10652	16 bits Unsigned Integer	Read / Write
4	Reference panel number of cleaning cycles (1-10)	10653	16 bits Unsigned Integer	Read / Write
5	Reference panel clean ON Time (sec) (5-99)	10654	16 bits Unsigned Integer	Read / Write
6	Reference panel clean OFF Time (sec) (5-99)	10655	16 bits Unsigned Integer	Read / Write
7	Soiled panel number of cleaning cycles (1-10)	10656	16 bits Unsigned Integer	Read / Write
8	Soiled panel clean ON Time (sec) (5-99)	10657	16 bits Unsigned Integer	Read / Write
9	Soiled panel clean OFF Time (sec) (5-99)	10658	16 bits Unsigned Integer	Read / Write

Table-8.5: Cleaning system configuration parameters

8.6 Cleaning System Control Parameters

Cleaning system command registers.

Sr. No	Parameter	Register Address	Туре	Read/Write
	Reference Panel			
1	Cleaning control (i)	10660	16 bits Unsigned	Write only
1	b0: Start	10000	Integer	write only
	b1: Stop			
	Soiled Panel Cleaning			
2	control (ii)	10661	16 bits Unsigned Integer	Write only
	b0: Start	10001		write only
	b1: Stop			
	Cleaning Hardware			
3	b0: Pump On	10662	16 bits Unsigned	Write only
	b1: Valve Clean	10002	Integer	write only
	b2: Valve Soiled		_	

Table-8.6: Cleaning system control parameters

Note:

- i) Reference panel cleaning control: 'Start' will start the cleaning operation of reference panel. It will stop after completing the cleaning cycles as configured via the webserver. 'Stop' will terminate cleaning operation of the reference panel.
- ii) Soiled panel cleaning control: 'Start' will start the cleaning operation of the soiled panel. It will stop after completing the cleaning cycles as configured via the webserver. 'Stop' will terminate cleaning operation of the soiled panel.
- iii) The pump and valves will be on for the time configured via the web server if Power Supply is available and water level is above the low level.

Cleaning System Status Parameters Cleaning system status registers. 8.7

Sr. No	Parameter	Register Address	Туре	Read/Write
1	Cleaning System Status b0: Cleaning System Power Status b1: Water Level Low b2: Water Level High b3: Pump Status b4: Valve Clean Panel b5: Valve Soiled Panel b6: Reference Panel clean ON b7: Soiled Panel clean ON	10663	16 bits Unsigned Integer	Read only
2	Cleaning Cycle Number	10664	16 bits Unsigned Integer	Read only
3	Pump ON Remain Time	10665	16 bits Unsigned Integer	Read only
4	Pump OFF Remain Time (sec)	10666	16 bits Unsigned Integer	Read only

Table-8.7: Cleaning system status parameters

10 Soiling Station Diagnostics

Configuration and operation of MBSoiling Station is quite simple. It can be easily configured using the default settings.

Some of the probable problems and solutions are listed below.

10.1 Download Device Status and Values Report:

Download status report and logged messages as shown in sec. 7.7.1. and sec. 7.7.2. This report will enable better understanding of the problem.

10.2 Embedded Webserver

Sr. No.	Problem	Solutions
1	Unable to login to Device	 i) Check that proper IP set in the device is being used. ii) Try default device IP. iii) Confirm that there is no IP clash in the network. iv) Check that IP set is as per network class. v) If user has closed the webpage without logout – wait for about three minutes before attempting next login.
2	Unbale to login. Message 'Soiling Station is being configured. Login after some time'.	This message is generated if user tries to login while the device is being configured. Try to login after 10 to 15 seconds.

 Table-11.2: Embedded webserver problems

10.3 ETH Network

Sr. No.	Problem		Solutions
1	SNTP client not able to update time.	i) ii) iii) vi)	Check that network gateway has been configured properly and connected to the LAN. Check gateway status on webserver diagnostics. Check availability of internet. Verify NTP server IP set in the Device. Verify operation of the NTP server via ping.

Table-9.3: ETH Network problems

10.4 Soiling Station Modem

Sr. No.	Problem		Solutions
1	Modem is unable to	i)	Check cellular signal strength via
1	register to network.		webserver diagnostic.

	ii)	Connect the antenna securely and place
		the antenna to get best signal strength.
	iii)	Verify that SIM is inserted properly.
	iv)	Verify correct selection of cellular
		service provider.
	v)	Check that there is enough balance in
	*	the SIM for data communication

Table-9.4: Soiling station Modem

10.5 Soiling Parameters

Sr. No.	Problem		Solutions
1	Panel temperature	i)	Check proper connection of the panel
1			temperature sensor.
2	Panel voltage and current	i)	Verify that panel has been connected
			properly.

Table-9.5: Soiling parameters

10.6 File Transfer Operation

Sr. No.	Problem		Solutions
	File transfer not OK.	i)	Check the media for file transfer
			Modem of ETH.
		ii)	If modem is selected – check that no
			problem exists with modem.
1		iii)	If ETH is selected – check problems
			with ETH network.
		iv)	Verify configuration of IP, username
			and passwords for remote file servers.
		v)	Check file servers with ping

Table-9.6: File transfer Operation

10.7 Datalogging Operation

Sr. No.	Problem		Solutions
1	SD Card problem	i)	Check SD Card status on OLED or
			webserver.
		ii)	Check that SD card is inserted
			properly.
		iii)	Put Off the datalogger, remove the SD
			card. Verify operation of SD card on
			PC or laptop.
		iv)	If required format the SD card.
			Remember to save the logger files prior
			to formatting the SD card.
2	Parameter values are not	i)	Verify that datalogging operation is
	being logged		enabled for the remote server.

	i	i)	Check if the data log file directory is
			full.
	i	ii)	Check configuration for <u>file directory</u> .
	i	v)	Verify that the parameter has been
			configured for logging.
- 11 0			

Table-9.7: Datalogging Operation

For other problems please contact service@mbcontrol.com .

11 Soiling Station Library

List of libraries provided in MBSoiling Station is provided below.

Option of 'Input Not Used' is provided for all inputs, if the same is not used.

10.1. Library for Solar Panels

List of solar panels is provided in table-10.1 below. This selection can be done at MBCS works only.

Sr. No.	Panel Wp	Comment
1	35Wp	To be selected during system configuration.
2	50Wp	

Table-10.1: Library of solar panels

12 Revision History

Revision	Date	Description
1.01	2022-01-01	Document created
1.02	22-03-18	Procedure for setting default IP is added.

Table-11: Revision History
