

# VRM Module Quick Start Manual

## SATEC Voltage Regulator Module For Direct Current Applications

Mounting, electrical connection and settings of the VRM Module shall be made in accordance with all applicable laws and/or regulations and be performed by authorized personnel only.

SATEC VRM Module is designed for connecting SATEC meters to DC voltage systems above meter rating (800V DC for PM130 PLUS and 800V DC for PRO EM235/PM335) ranging up to 1500V DC.

Dimensions: 127 x 75 x 52 mm

Weight: 80 grams

Installation: DIN-Rail only

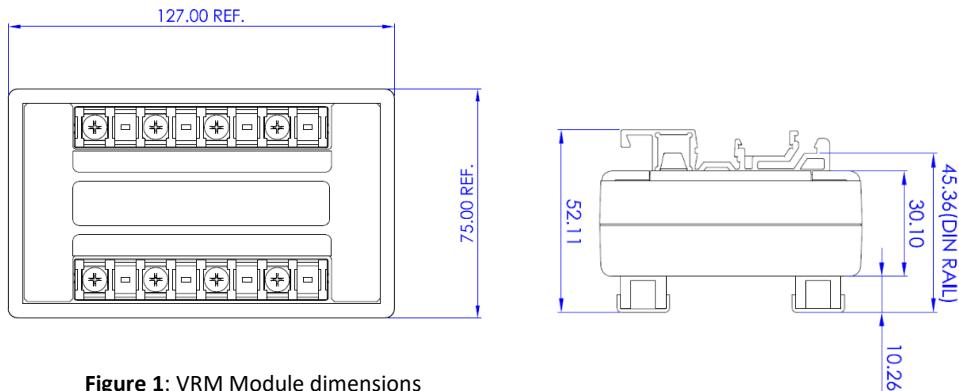

Figure 1: VRM Module dimensions

Figure 2: VRM Module

## VOLTAGE RATIO MODULE CHARACTERISTICS

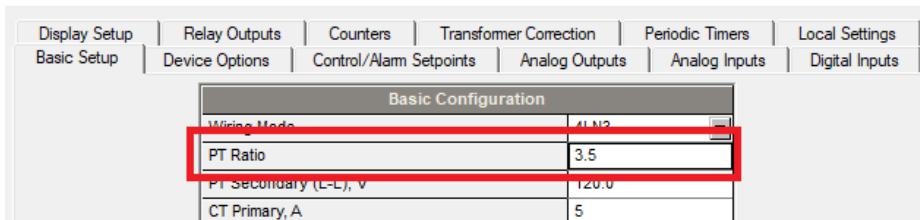

- Accuracy = 0.1%
- 3 Independent voltage inputs
- Terminals: Wire size: 12 AWG (up to 3.5 mm<sup>2</sup>)
- DIN-rail installation

## ELECTRICAL INSTALLATION

It is recommended that the distance between the SATEC VRM and SATEC meter should not exceed 2 meters, using cabling featuring minimum 600V insulation.

### PRO - General Setup

X

The screenshot shows the 'Basic Configuration' tab of the PRO - General Setup software. The 'PT Ratio' field is highlighted with a red box. The table below shows the configuration settings:

Basic Configuration	
Wiring Mode	4 LN2
PT Ratio	3.5
PT Secondary (L-L), V	120.0
CT Primary, A	5

When using SATEC VRM, the correct ratio coefficient must be set with PAS software software ("Basic Setup" tab):

- Using the PRO Series meters, enter "ratio" = 3.5
- Using the PM130 PLUS, enter "ratio" = 11 Ratio coefficient = 11
