MB Config User Manual

Version 1.2

Hardware needed:

1. Sensor Interface Cable
2. 12VDC Power Supply
3. USB to RS-485 Converter
4. Computer/Laptop with MB Config software and USB-RS485 converter
- 5.

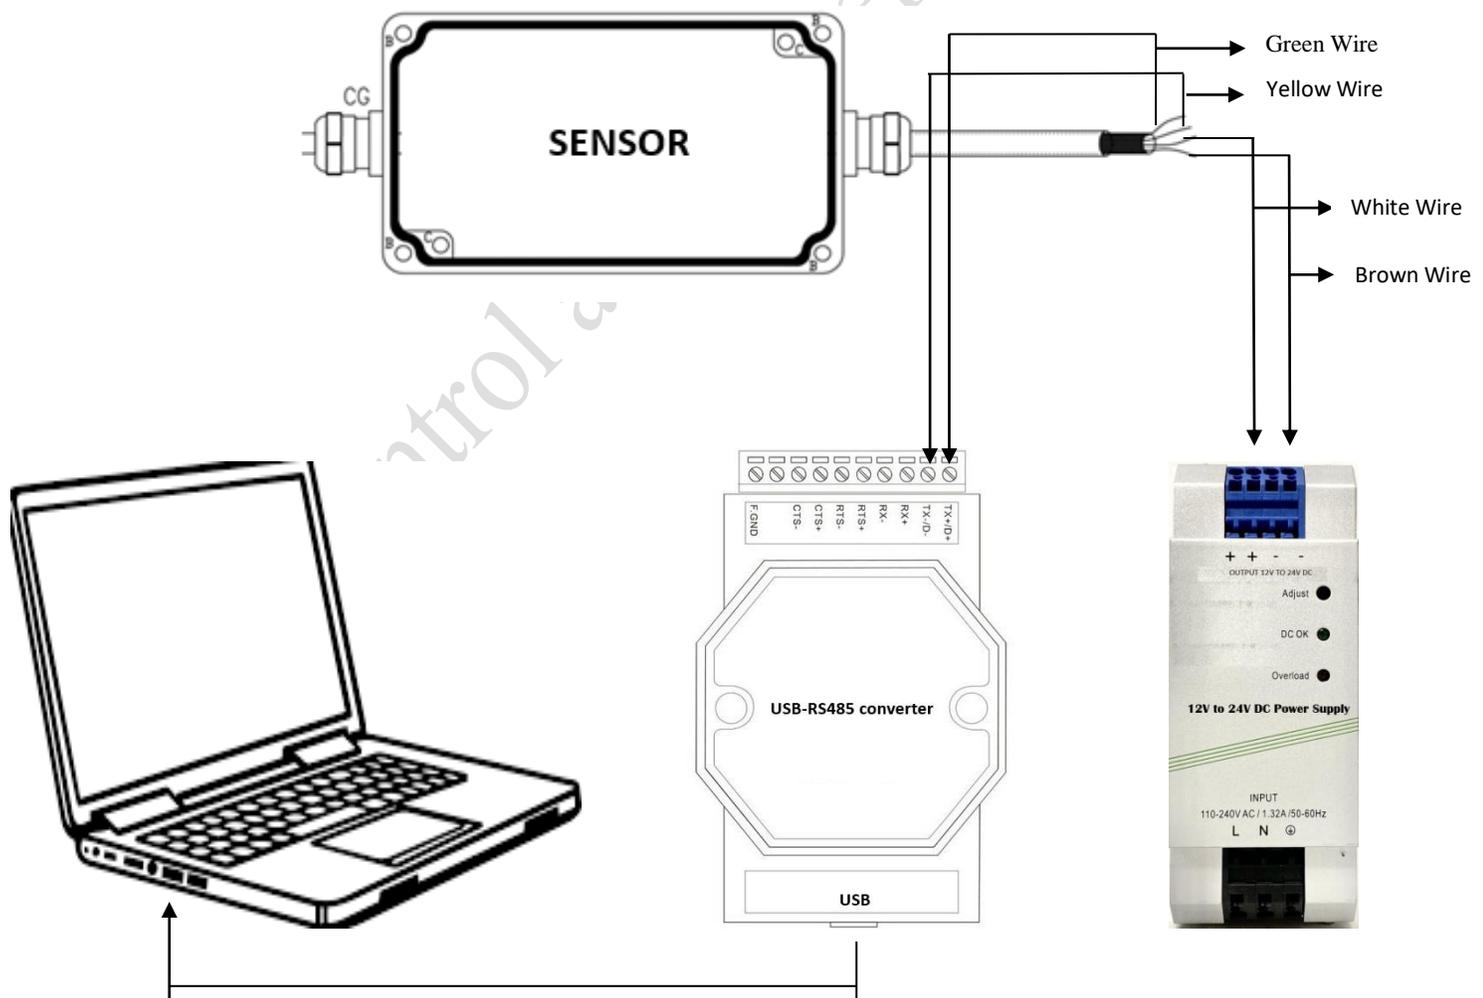

Connect Sensor with 12VDC Power Supply and USB-RS485 converter:

1. White Wire connect with 12VDC Power Supply (+V) point
2. Brown Wire connect with 12VDC Power Supply (-V) point
3. Green Wire connect with USB-RS485 converter (+D) point
4. Yellow Wire connect with USB-RS485 converter (-D) point

| Connector Pin Number | Wire Color | Connection to PCB Points |
|----------------------|-------------|--------------------------|
| 1 | White Wire | +V |
| 2 | Green Wire | RS-485 D+ |
| 3 | Yellow Wire | RS-485 D- |
| 4 | Brown Wire | -V |

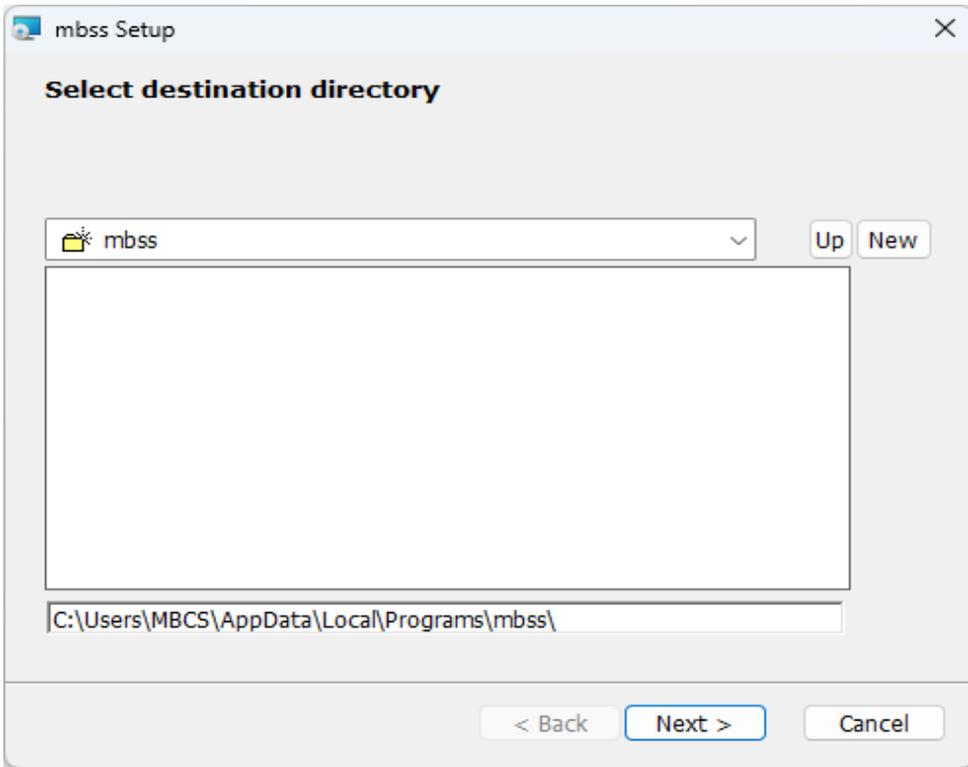

Sensor Connector details

Then USB-RS485 Converter Connect with Computer/Laptop. Check below picture demo complete connection

Installation:

Double click on installation file (mbssc-1.2-win64.msi) open below windows click to next button

After click next button installation process progress and after some time open below windows click finish button

After Finish MBSSC desktop icon generated and show at desktop below the icon picture

Now double click on MBSSC icon and open below windows

MB

There are two option communicating the sensor Auto Scan and Select Model Before it mandatory to select comport first then active this two option.

If use Select Model then show the below screen and select model which connected your PC or Auto Scan.

After Auto Scan or Select Model show the below screen.

Prolific USB-to-Serial Comm Port (COM3) MBMet-803 Auto Scan

Hardware Information Status

Model:- MBMet-803
 Manufacture Year:- 2024
 Serial No:- 23143
 Hardware Version:- 1.04
 Software Version:- 1.09

Communication

| Parameter | Current Value | Update Value |
|-------------------|---------------|--------------|
| Modbus ID | 1 | 1 |
| Baurd Rate | 9600 | 9600 |
| Parity | None | None |
| Stop bits | 2 | 2 |
| Temperature Units | Celsius (°C) | Celsius (°C) |

Update

Measuring Details Tx Rx

| Parameter | Integer | Float | Unit |
|----------------------|---------|-------|------|
| PV Module Temperatur | 263 | 26.3 | °C |

Now Update Communication parameter like Modbus ID 1 replace to 2
